

# **Juche Idea That Makes People Most Precious Beings**

## **Yahia Zakaria Khairallah**

Director, Board of Directors, African Regional  
Committee for Study of Juche Idea;  
Chairman, Egyptian Committee for Study of  
Juche Idea

Ladies and gentlemen at the International Institute of the Juche Idea in Japan,

Dear colleagues, heads of committees to study the Juche idea in the world, and the participants in the seminar held on the occasion of the birth anniversary of President Kim Il Sung.

Allow me at the outset to send greetings of appreciation and respect to the President Kim Il Sung on the occasion of his birthday, "The Day of the Sun," and send a message of appreciation and pride to our dear leader Kim Jong Il, who developed the Juche idea and explained it to be a human constitution to free all the people in the world and also my respect and appreciation to those looking for human independence.

Ladies and gentlemen,

I am sure that the participants in this seminar are those who adhere to the Juche idea or are keen to study it scientifically as an idea guiding the independence of mankind, homelands and nations, and those who take the opportunity to address the vitality of the Juche idea in terms of its origin and application. In terms of its origin, we find that its founder, President Kim Il Sung, was sincere in searching for the guiding idea which takes the minds and hearts of the Korean people to overcome the situation he lived under the exploitation of colonialism. Perhaps the secret that made the Juche idea a guiding idea is that it stems from the Korean reality and it has

become a guiding star to the human beings anywhere. More importantly, the greatness of the Juche idea is its vitality in the matter, its comprehension of all times. It is appropriate for each human being wherever he is on the face of the earth because it calls for the liberation of man and makes him the most precious beings, makes the masses of the people the masters of the revolution and construction, and places them in the rank of heaven so that they are innovated to be the active subject of history and the maker of miracles.

Ladies and gentlemen,

The great leader Kim Jong Il developed and enriched the Juche idea, the great independence idea invented by President Kim Il Sung, and made both the party and the state in Korea carry out their activities based on this idea.

The Juche idea was like a political philosophy that took a lifelong approach as well as a guiding idea for the issue of independence valued by the international community.

This human-centered philosophy says that man determines his destiny and has the power to make it possible for him to pave the way for his destiny.

The DPRK has remained steadfast and unwavering, century after century and its existence has taken hold thanks to the steadfast line of independence reinforced by the Juche idea.

The implementation of the Juche idea and making it a constitution in all political, military, economic, social and cultural fields gave the distinction to the Korean society in pursuing socialism centered on the masses of the people. The Juche idea was also the true nerve of the Workers' Party of Korea that puts the workers, intellectuals, peasants, all of them and all groups of people altogether in one melting pot. Also the Juche idea had a huge and even fundamental role in the approach of Songun policy to make Korea a mighty power that cannot be underestimated and even to put the enemies on the defensive. The Juche idea founded and developed by the great leaders of Mt. Paektu makes world leaders not only of the friendly countries but also of the hostile countries witness its vitality. The founder of the Juche idea, President Kim Il Sung, had a high international status and his successor, mighty and energetic dear leader Kim Jong Il, who developed this idea and put it into practice, had a prominent international status.

Ladies and gentlemen,

A good follower and observer of the DPRK's policy these days finds the influence of the Juche idea evident by reading what was stated in the Eighth Congress of the Workers' Party of Korea, which was held at the beginning of this year. General Secretary Kim Jong Un's speeches at the Eighth Congress of the Workers' Party of Korea had a new revolutionary effect and a new approach that traditional socialism had not known before.

Honesty was the title of the General Secretary's speeches and honesty was the way to carve out the new era and his disclosure was a guide for overcoming obstacles like imperialism, and the flag is one of the means in which the aspirations of nations are fulfilled. The General Secretary's speeches set the constitution for the launch of the Juche nation.

Thanks to the Juche idea, the political thought of the Workers' Party of Korea has become one of the most prominent ancient intellectual trends that takes place in the interest and thought of an unlimited number of thinkers and experts around the world, especially after the successful conclusion of the Eighth Congress of the Party, as this Congress represented a revolutionary party touching reality, taking a development approach. New socialist ideological trends emerged from this Congress, which is considered a revolution in modern socialist political thought, where the party took a new approach to confronting reality and touching it to overthrow all old ideas and open up new partisan intellectual horizons. General Secretary Kim Jong Un, also took a transparent approach to the disclosure, the way to confront the obstacles and challenges that stood in the way of achieving some of the desired goals in the required manner, which were recommended by the Seventh Party Congress. Being confronted with the Korean society with transparency and disclosure, General Secretary Kim Jong Un held the condition of credibility and respect for the people to face all challenges, declaring responsibility and expressing his courage in facing challenges side by side with the Korean people. Perhaps this is a unique style of socialist leadership invented by Supreme Leader Kim Jong Un.

We have previously indicated in several articles that General Secretary Kim Jong Un is using a new method in political work, "the method of political shock" by declaring the facts without equivocation or deception, and confusion

occurs on the other side, who finds himself facing a new political style, the slogan "Courage, Transparency and Credibility", the best way to meet the challenges. Behind all this is in the long run, a mighty military force, which protects that unique style, and preserves the Korean nation and its human-centered socialism.

Ladies and gentlemen,

If we review what was stated in the opening speech of the Eighth Congress, we find that General Secretary Kim Jong Un reviewed the results of the Seventh Congress with full transparency, and confirmed that the Workers' Party of Korea has achieved victories that will be written in letters of light in the history of the Korean nation. The party has also achieved some successes and provided great foundations that will contribute to the acceleration of building the economy and improve people's livelihood.

Nevertheless, he declared with full transparency and credibility that "despite the end of the implementation period of the five-year strategy for developing the country's economy last year, its set goals have not been achieved to a massive degree in almost all sectors."

He also stressed that "we face challenges of all kinds exist abroad and at home, those that hinder our efforts and our progress towards a new and continuous victory in socialist construction."

Kim Jong Un, General Secretary of the Workers' Party of Korea, did not blame natural disasters or an unjust blockade, but held the Korean self-responsible for realizing the dream despite all obstacles, confronting oneself, adopting knowledge and disclosure as a way to solve all problems, placing confidence in the party, the people and the armed forces in achieving the dream. By analyzing and revealing facts, such as what are the errors in the process of implementing the decisions of the Seventh Party Congress, the quality of failure to perform what can be performed, what work has been done effectively or in a formal manner, what is the cause of the error, if any, and what is the defect in the party direction.

About frankness and disclosure, isn't it a radical change in socialist policy? Perhaps I hereby predict that General Secretary Kim Jong Un will create a new approach to Korean socialism, adhering to its authenticity again in its spirit, form and methods of implementation to keep pace with the reality and proceed in the path

of development and progress, taking the Korean people as the center of it like his predecessor, searching for their inherent strength.

Ladies and gentlemen,

Before I finish my speech, I want to review the experiences and lessons in the work of the Egyptian Committee for Study the Juche Idea. For nearly twenty years ago it was established to take science as a path for it by studying the Korean reality and the effect of the idea on it in an effort to guide the thought in the definition of human value and independence and make the popular masses an indomitable force armed with the Juche idea. We have studied all the books of President Kim Il Sung, Leader Kim Jong Il and General Secretary Kim Jong Un and we have conducted many researches and studies and written books and organized for a decade hundreds of seminars to explain what the Juche idea is and its impact on the progressive countries of the world. The Juche idea also allowed us to study Songun idea, which represents a title of human dignity in this world. We also made a comparative study between the Juche idea and other philosophical ideas. And it became clear to us the greatness and importance of the Juche idea for the whole international community to benefit from it. And we found that there is no escape from the Juche idea, to be applied in a way that suits the countries, each according to his own circumstances. The Juche idea is a loose garment that fits all times, places and cultures because it takes from man a goal as the most precious creature on the earth.

Ladies and gentlemen,

In Egypt, we are grateful for the Juche idea and he who created it, he who developed it, and he who renewed its dress to keep pace with global changes so it would be a great idea. All Arab countries would benefit from it and they could learn from this idea to suit their circumstances.

Finally, I congratulate General Secretary Kim Jong Un for his success in confronting the challenges. The global epidemic of the novel coronavirus, as well as the imperialist epidemic that is no less dangerous than the novel coronavirus because it tries to harness and enslave people by force and it even brags about demanding human rights and is the first to violate them with the nuclear bomb and colonialism and the systemic global prisons and robbing the country everywhere. As for the Juche idea, it has made people valuable beings and placed the masses of the people

in the sky. My sincere appreciation to the Korean people, leadership and people, and the Juche idea will remain as great as he who found it, he who developed it, and he who made it in a new dress.
