

Workers' Party of Korea Develops under Distinguished Leadership of Great Leader

—In Congratulation of 75th Founding Anniversary
of Workers' Party of Korea—

Ogami Ken-ichi

Secretary General, International Institute of Juche Idea

This year the Workers' Party of Korea greets its 75th historic holiday.

The WPK, founded by President Kim Il Sung, leads the people to a future society where Kimilsung-Kimjongilism will be translated into reality while fulfilling its duty as the people's Party under the wise leadership of General Secretary Kim Jong Il and Chairman Kim Jong Un.

For 75 years the WPK has not only defended firmly the socialist country but made weighty contributions to the world people's struggle for independence.

The WPK's 75th founding anniversary is an auspicious event of the world people who greet with boundless respect for President Kim Il Sung, General Secretary Kim Jong Il and Chairman Kim Jong Un, the revolutionary leaders who founded the Party and strengthened and developed the Party.

1. Workers' Party of Korea Is Juche-oriented Party Whose Guiding Ideology Is Kimilsung-Kimjongilism

History had never recorded such a revolutionary party as the WPK that has served consistently as a guide of the people's cause of independence for a long period covering 75 years.

President Kim Il Sung founded the Juche idea in the flames of the national liberation struggle and founded the WPK with the Juche idea as its guiding principle for the first time in history on October 10, 1945, with the communists tempered in the anti-Japanese revolutionary struggle as its core.

The WPK has been strengthened and developed into the revolutionary Party of Juche which continued the monolithic ideology and unified leadership of the President who regarded *The people are my God* as his motto, reliably defended the people's independence and paved a path for the society where the people's independence is fully realized.

True to the President's leadership, the WPK won victory in the aggressive war of the US imperialists in close unity with the people who turned out to safeguard the newly independent country. The Fatherland Liberation War brought about the beginning of a downfall for US imperialists and served as an example in the people's struggle against imperialism and the US.

President Kim Il Sung solved the tasks of the socialist revolution including the agricultural cooperativization in a fresh way and the DPRK people turned out in socialist construction with a high sense of being the masters.

President Kim Il Sung also elucidated comprehensively the criterion of socialist society and the ways of building socialism that the preceding theories failed to explain.

A revolutionary party is, in essence, the leader's party that realizes the ideology and cause of the leader, and the main in party building is to ensure monolithic ideology and unified leadership of the leader and realize their continuity.

The WPK has satisfactorily settled the issue of carrying forward the revolutionary cause which other countries have never done, thus covering the path of victory.

President Kim Il Sung brought up General Secretary Kim Jong Il, leader of new generation, in the flames of the Fatherland Liberation War and the stirring reality of the socialist construction to pave a way of carrying forward the revolutionary cause of Juche.

General Secretary Kim Jong Il formulated the revolutionary idea of the President as Kimilsungism, the integrated system of the idea, theory and method of Juche, and developed the WPK into the Kimilsungist Party, the General Staff of the revolution that implements the leader's ideology.

General Secretary Kim Jong Il considered it as the highest programme of the WPK to model the whole society on Kimilsungism so as to illuminate the road of realizing mission and aim of the Party which defends independence of the popular masses.

Socialism collapsed in several countries, the DPRK suffered from natural disasters several times and the US imperialists intensified nuclear preemptive attack and other military suffocation against the DPRK. Under such condition, the General Secretary saw that socialism was defended and the DPRK won victory by carrying out the Arduous March.

Talking with Russian Juche idea researchers (in May 2017)

The General Secretary raised Chairman Kim Jong Un as a successor to the revolutionary cause of Juche in the harsh struggle of the Arduous March. The General Secretary said that the Chairman acquired in the period of the Arduous March the truth that trust is more important than love.

Chairman Kim Jong Un inherited completely the cause of President Kim Il Sung and General Secretary Kim Jong Il and proclaimed the guiding ideology of the WPK as Kimilsung-Kimjongilism.

The WPK led by the Chairman is being strengthened and developed into the Party whose aim is to train the Kimilsung-Kimjongilists and model the whole society on Kimilsung-Kimjongilism.

The society which the WPK aims at, the society which is modeled on Kimilsung-Kimjongilism is the one where the popular masses are centred in all aspects of ideology and culture, politics and economy, the one where affluent art is in full bloom and medical service for the people and highly developed education are ensured, and the society where human relations are made by comradeship. The society which is modeled on Kimilsung-Kimjongilism in foreign relations is the one which strengthens cooperation and solidarity with different countries in the world on the basis of independence.

Cherishing a firm conviction that Kimilsung-Kimjongilism is, in essence, the people-first principle and it is the WPK's mode of existence to make selfless and devoted efforts for

the good of the people, Chairman Kim Jong Un devotedly serves the people to cement the ties between the WPK and the people as firmly as a rock.

Saying that it will be a pleasure of the President and the General Secretary to present the biggest gift to the people on the occasion of the 75th founding anniversary of the WPK, the Chairman is leading the construction of the modern large-scale Pyongyang General Hospital.

At the ground-breaking ceremony for the construction of the Pyongyang General Hospital, the Chairman delivered a speech “Let Us Build a Splendid Pyongyang General Hospital to Mark the 75th Founding Anniversary of the Workers’ Party of Korea.”

In his speech, Chairman Kim Jong Un said:

“Our Party regards the people-first principle as its inherent nature and sacred political creed. So, protecting and improving the health of the people is a most pressing and honourable revolutionary undertaking, which it should shoulder and fulfil without fail, whatever the situation.”

Today, ideal of mankind can be found only in the DPRK. The DPRK builds in an excellent way the society in which culture, education, science, technology and medical service are developed rapidly and the people cooperate and help with each other like one family.

2. Global Independence Contains Affection for and Trust in the World People

President Kim Il Sung is the world people’s leader who devoted his all to the happiness

At a Mexican Youth Seminar on the Juche Idea (in February 2019)

for the world people as well as the Korean people.

Since he started revolutionary activities, the President made efforts to develop the anti-imperialist joint struggle and the international communist movement in solidarity with the world progressives.

The President set forth the global independence for the building of a free and peaceful new world.

President Kim Il Sung said:

“Today the common task facing the progressive people of the world is to build an independent new world. By an independent world I mean a world which is free from domination and subjugation between countries and nations and from aggression and war, in other words, a new world where the international community has become democratic.”

The President rendered assistance to the founding of the International Institute of the Juche Idea, and this is the President's deep affection for and trust in the world people.

In 1977 when he received a delegate of the Japanese Society for the Study of the Juche Idea, the President said that the world people demanded the Juche idea and were desirous of establishing a permanent international organization which is to study and disseminate the Juche idea.

That all countries adhere to the line of independence in politics, economy and military is the way of realizing independence and peace of the countries and the world and the one and only way of winning victory in the struggle with imperialism that stretches out its tentacles of aggression to several countries in the world.

The IJJI considered that if the people in many countries of the world are to make the world independent, the Juche idea is indispensable and priority must be given to the work of making the people in many countries of the world accept the Juche idea. Accordingly, the IJJI exerted its possible effort for Juche idea researchers throughout the world to conduct their study and dissemination of the Juche idea while relying on the people of their own in conformity with the reality of themselves.

President Kim Il Sung showed big expectation and deep concern so that the IJJI could perform its role. The General Secretary did so, and the Chairman is now paying deep attention and concern to the IJJI as his preceding leaders did.

General Secretary Kim Jong Il clarified that independence, peace and friendship are

the ideals of the WPK's foreign policy and the important and responsible duty that enables to strengthen international solidarity and contribute to the cause of global independence.

General Secretary Kim Jong Il said:

“We must make dynamic struggle to strengthen unity and cooperation with the progressive people throughout the world and to democratize the international community. We will thus fulfil our international duty and historic mission in the struggle to defend the independence of all countries and nations and to make the world independent.”

Believing in the youth and students in the world, the General Secretary led them to make their every possible effort for the world independence and peace. The General Secretary saw that the 13th World Festival of Youth and Students was held in Pyongyang in 1989 under the slogan “For Anti-imperialism and Solidarity, Peace and Friendship!” delegates of youth and students organizations from over 180 countries in 5 continents gathered in Pyongyang.

Even in the tense days of leading the severe struggle with imperialism, the General Secretary took precious care of the IJJI, regarding it like “one nation and one state.”

When the General Secretary passed away, Chairman Kim Jong Un took into account of the sorrow of the world Juche idea researchers and saw that an IJJI secretariat delegate attend the funeral ceremony. The Chairman also showed special solicitude by kindly receiving him in an event held in celebration of the 70th founding anniversary of the DPRK.

In the report to the 7th Congress of the Workers' Party of Korea on the work of the Central Committee, Chairman Kim Jong Un set the global independence as one of the report systems and stated that making the whole world independent is the general task of the WPK and the government of the Republic.

Chairman Kim Jong Un said:

“Our Party and the government of our Republic will invariably advance straight ahead along the road of independence, Songun and socialism, regardless of changes in the situation and relations around us, and occupy the vanguard in the struggle for global independence as befits the champion of independence and justice.”

The DPRK strengthens cooperation and solidarity with other countries on the basis of independence in foreign activities. The DPRK stands against the US with dignity of being an independent sovereign state.

Expressing her gratitude to the personal letter from President Trump, Kim Yo Jong, the first vice-department director of the WPK CC noted that relations of the two countries and dialogue for their improvement can be considered only when the dynamic and moral balance is maintained and justice is ensured between the two countries, thus expressing that the DPRK's independent stand remains unchanged and the DPRK people hasten socialist construction on the strength of self-development even in severe circumstances.

The world Juche idea researchers make active study and dissemination of the Juche idea, feeling warm love of the leader and keeping pride of realizing independence of the world and their countries.

In Japan, they formed the Society for the Study of Kim Il Sung's Works in the 1970s, the Society for the Study of Kim Jong Il's Works in the 1990s and the Society for the Study of Kim Jong Un's Works in the 2010s and made efforts to profoundly study and disseminate ideas and activities of the leaders.

We can make contribution to the world people's struggle for independence and peace only when we inform the broad masses of the people of validity and might of Kimilsung-Kimjongilism and make them cherish Kimilsung-Kimjongilism as their faith.

The world Juche idea researchers are conscious of importance their duty and diversity of their tasks and resolve to make strenuous efforts for them with the 75th founding anniversary of the WPK as a new starting point.

3. Chairman Kim Jong Un's Distinguished Leadership Ability Proved in Dealing with COVID-19

At present, COVID-19 has become an important international problem since World War II.

Some 6 million people (as of June 1, 2020) in 190 countries have been infected with COVID-19 and the governments in the countries fail to take appropriate measures to check its infection and thus the number of COVID-19 cases and deaths increase every day.

COVID-19 should be dealt with as a medical problem and at the same time, political leaders should take correct anti-epidemic, check-up and treatment measures in an appropriate period. Or it is unable to be settled.

Two governments of Japan and US did not consider COVID-19 as a grave threat that can shake the history but delayed taking countermeasures, thus expanding catastrophe.

The Trump administration started the first PCR test in early March and the Abe government convened a meeting of medical experts on February 16 and requested closure of primary, middle and higher schools throughout the country on February 17 without due deliberation. As a result, policies are driven in dilemma.

Counteraction of the Japanese and US governments toward COVID-19 showed incompetency and anti-popular character of the political leaders. It also underlines that they are faced with serious economic crisis owing to the structural contradiction of imperialism.

Before the outbreak of COVID-19, the US had concealed its economic crisis with the bubble economy run by money game. However, the bubble economy reached its limit, thus giving rise to huge bad debts that amounts up to 1.6 times as compared with the Lehman Shock. With rapid expansion of the bubble economy, \$10,000, the price of stock of 10 years ago was increased by 3 times, that is, \$30,000 at the beginning of this year. Price of stock market was decreased to \$20,000 again with it as an occasion that interest had been lowered in March. In a certain sense of meaning, sharp break in the price of stock market can be said to be control of the bubble economy.

Many problems are caused because the imperialist economy is faces with crisis. Unemployment rate made public by the US Ministry of Labour reaches to 15% (as of May 28, 2020).

At present, the imperialist countries invest huge public finance to financial capital and big businesses by using the matter of COVID-19 so as to escape from the control of bubble economy and the economic crisis.

The US spent 2.9 trillion dollars on the pretext of taking measures to cope with COVID-19, and as a result, a financial deficit of the fiscal year 2020 has expanded by 3.7 trillion dollars, the worst in the past.

The Japanese government appropriated finance that hits the postwar high of 108 trillion yen, the biggest financial investment after World War II on the pretext of taking measures to deal with COVID-19. It is the 20% of its GDP, and dependence rate of the government bonds increases by 41%.

Furthermore, the imperialists cause division between countries and instigate confrontation and chauvinism by using COVID-19.

Humankind has overcome many infected diseases, and therefore, efficient vaccine capable of preventing COVID-19 shall be developed. It will be a matter of time.

At a Gathering to Recollect President Kim Il Sung in Abashiri, Japan (in July 2019)

However, we should give warn to imperialist moves to spread poisoning of division and chauvinism, administer and control the people and tend to ignite aggressive war, by taking advantage of the present opportunity.

Only DPRK Chairman Kim Jong Un in the world defends the people's life and provides them with sound life by correctly settling the problem of COVID-19 which is threatening the world.

Chairman Kim Jong Un has achieved several historic causes which others failed to do since he was elected the Supreme Leader of the Party and the state, thus striking the world with admiration.

Chairman Kim Jong Un has emerged victorious by hastening the building of nuclear armed forces with self-reliance, neutralized the moves made by the US imperialists who resort to nuclear weapons and paved a way to build a nuclear-free peaceful world.

Chairman Kim Jong Un evidently clarified that there is no big power for the DPRK to be afraid of if the people are firmly united in thought and purpose and hold independence of their country.

Chairman Kim Jong Un brought the historic DPRK-US, DPRK-China, DPRK-Russia and inter-Korean summit meetings to success in a short period and thus turned at one time the tense situation in Asia and the world into the trend of independence and peace.

The image of the north and south Korean leaders who took hands of each other instilled in the people's mind the conviction in and hope for reunification, and the image of the top leaders of the DPRK and the US who were crossing the military demarcation line in Panmunjom gave hope to the countries that had been seized by fear about imperialism and suffered under its subordination.

Resolutely holding independence, Chairman Kim Jong Un steadily accelerates the building of the Juche-oriented socialism while leading dynamically the trend towards global independence and peace.

Chairman Kim Jong Un's leadership to cope with COVID-19 was an event that proves once again his distinguished leadership ability before the world.

As soon as outbreak of COVID-19 in China was reported in December last year, Chairman Kim Jong Un saw that accurate and perfect anti-epidemic, check-up and treatment measures were taken immediately.

Chairman Kim Jong Un analyzed the situation in which COVID-19 spreads so rapidly, its incubation is uncertain and its contagion route is also scientifically uncertain, and saw that thoroughgoing anti-epidemic measures were taken first to completely check every infection way.

From January this year, the emergency anti-epidemic headquarters organized in the capital, provinces, cities and counties of the DPRK have been intensifying activities under the unified guidance of the Central Public Health Guidance Committee. The DPRK establishes the strict quarantine system of inspecting and disinfecting materials imported through borders and ports, to say nothing of the returnees from abroad, and leave them in a state of tight closure for 10 days before handing them over to the relevant units. The Central Hygienic Prevention Center, which has established the national system of transporting specimen, equipped itself with facilities of making proper diagnosis of COVID-19 to intensify inspection. Those in the public health sector intensify activities of hygienic propaganda, inspection and treatment and take thoroughgoing measures of finding out the patients with fever and coughing on time, examining them correctly, hospitalizing and quarantining them.

At the Enlarged Meeting of the Political Bureau of the Central Committee of the WPK held on February 29 this year, Chairman Kim Jong Un said that the anti-epidemic measures being taken by the Party is a crucial state affairs for the defence of the people and a heavy responsibility of the Party Central Committee, not just the prevention of the disease.

Chairman Kim Jong Un's political faith and people-first principle of making devoted efforts for the good of the people can be clearly found in his saying.

The meeting of the Political Bureau of the Central Committee of the WPK held on April 11, 2020 by Chairman Kim Jong Un discussed and decided "On more thoroughly taking national measures to protect the life and safety of our people from the pandemic disease." It reflects Chairman Kim Jong Un's will to protect the people from the disease and the resolution of the WPK and the people to make every effort to translate the Chairman's intention into reality.

Chairman Kim Jong Un's incomparably correct judgment, executive faculty of immediately enforcing unimaginable policies, power of uniting the people with one thought and purpose — all of these are expressed clearly in the proper measures taken to deal with COVID-19.

The era when the people were looking with agony for a leader to whom they could entrust everything came to an end, and a bright future is opened up before the world people who have Chairman Kim Jong Un.

There has never been such an era as today when the fact that the future society desired by the masses is the one which is led by Kimilsung-Kimjongilism is clarified.

The world researchers of Kimilsung-Kimjongilism refresh their determination to be more active keeping in mind the pride of being the pioneers who disseminate Kimilsung-Kimjongilism throughout the world and their countries.
