

# **DPRK Victorious with Independent Policy**

Mashbat Otgonbayar Sarlagtan

Director, Board of Directors, Asian Regional Institute of the Juche Idea,

President, Mogolian Association for Study of Juche Idea and Songun Politics

Pandemic Covid-19 and countermeasures that countries have taken indeed has tested the individual countries defense capability, social solidarity and level of economic self-sufficiency as it was a biological warfare-like condition.

Many countries, including the Great Powers such as China, Russia, the United States and many others have eventually failed to adequately respond this pandemic due to a weak social mobilization, inherent with its capitalist

nature.

The DPRK, under the banner of the true principles of Juche and Songun idea, excelled from the countries of the world. It has no infection case in the country and keeps prosperous even under long lasting imperialist international economic sanctions.

## **Western Countries Response**

The Pandemic Covid-19 has revealed many shortcomings of capitalism.

Great Powers and imperialist countries have a strong military forces although a weak public support for the sustained military efforts. This leads to conclude that their military forces are not aimed to assist their people, but to invade and enslave poor nations instead. That is why the armies were so weak to effectively respond the pandemic within the country, and in many countries, popular protest were observed, proving a grave nature of the system.

The pandemic has also revealed that the imperialist powers are vulnerable from biological warfare and has very limited, if not at all, capability to respond it. Wartime emergency regime taken in Italy and selection process of survivable patients, who were mostly younger than 60,

has eventually driven to the discrimination of its people by age, furthermore, to social divide. Doctors have refused to take care of elderly people as they were hopeless to be treated, wasting them alive, and many poor elders left helplessly waiting for their moment of death. In this social divide, the country has indeed failed to biological warfare-like condition.

Covid-19 case has also revealed inhumanity of the capitalist monopolists. The most of the Great Powers, including the United States have tragically wasted a precious time to respond the pandemic, but concerned only its economy. It has also showed that the priority of capitalism is not a human being, but money. Fearing the economy would not stand long during the quarantine, those capitalist governments were reluctant to take a decisive countermeasures to defend their population. Financial and economic lords' greed is the prime reason of the failure. Inhuman nature of the capitalist countries and their political systems protecting this tendency eventually revoked social unrest in many countries. President Tramp has made a dark joke about the pandemic naming "China virus" and falsely declared that the American people are immune from it.

Although not eventually he said it, this dark joke has deliberately illustrated racial and fascist nature of the Washington regime. Series of events like police brutality that has tragically killed an innocent black American, black people's rightful protest under slogan of "Black lives matter" followed by this brutal murder, white people armed with guns and scared from black unrest and etc., have all demonstrated weakness of the American political system and the social structure based on the racism. Besides, brutal bloody suppression of this movement has also proved the fascist nature of the Western regime.

In short, the Western countries have completely failed to respond the grave pandemic, which fact has also revealed fatal weakness of the capitalist state and the social structure.

## **DPRK Victorious Response**

From all the countries in the world, the DPRK has expelled by its successful policy. The Kimilsungism-Kimjongilism banner was raised high and all the principles of the Juche idea made real. Comparing to other countries, it should be mentioned that the DPRK fights in two-fronts today; one is the pandemic Covid-19, a biological warfare-like catastrophe, and the other is the long-lasting economic sanction imposed by the imperialist nations. Even though, the DPRK remained victorious.

The DPRK only cared for people, not money. It has closed the border, enforced a strict sanitary regime and locked down its towns as early as January this year although the country was still in economic sanction. Pyongyang General Hospital construction, which will be ready in October as a gift to the WPK's 75th founding anniversary clearly demonstrates the human-centered principle as the core idea of Juche. Chairman Kim Jong Un's recent visit to the construction site and his wise guidance given to the workers have shown his genuine love for the people and the well-established anti pandemic strategy, whose fact is rarely seen in other countries.

Imperialism countries focus on money and prioritizes exploitation of poor colonies, yet their economy has tremendously suffered from the pandemic. Being different from them, the DPRK focuses on human well-being and works even under the international sanctions, its economy was stable and has even grown more in 2020. The price of rice and corn was stable and gasoline price was even dropped. The weather this year is favorable for harvesting, which guarantees a solid base for stable food supply. Although typhoon has striked the DPRK agricultural regions, people are working hard for minimizing the damage after the Chairman's inspection of typhoon-damaged provinces like South Hwanghae Province. The Chairman and the government of the DPRK work hard to improve daily of the people.

The human-centered core principle was not only stopped with economic policy, but with social cares. Food was mobilized from wartime reserves and distributed to the population, especially to common workers. It was much rightful decision and makes a sharp contrast from other Western capitilist states, where military was mobilized to prevent and suppress popular unrest. Helping to the population has caused no harm to the Army, but has effectively generated public support for it, which is evidently shown by short-range ballistic missile tests taken in 2020.

## **Conclusion**

Under the banner of the rightful principles of the Juche idea and the Songun idea, the DPRK has remained victorious once again this year.

Widespread pandemic of Covid-19 has created a biological warfare-like condition throughout the world and many nations, namely the Great Powers have fatally failed to respond it. The main reason of this failure was related to the nature of their capitalist system and their

imperialist policy. Shortsighted joke over Covid-19, calling it as Asian or China virus has revealed the fascist nature of US policy and has hopelessly ruined in front of the reality. Greed for money, concealed by “concern for economic growth” has revealed inhuman nature of the system, prioritizing money over humans and eventually caused the loss of most treasured times, leaving the country in devastation and loss of thousands of lives. Armed forces designed for occupation and enslaving poor nations are proved to be incapable to respond the internal catastrophe, in helping its ordinary citizens.

In contrast of those countries, the DPRK response was quick and effective. The human-centered principle of the Juche idea demonstrated its truthfulness. Regardless harsh economic sanctions and risks, timely lockdown and introduction of sanitary regime were the key to the successful prevention of the Covid-19 pandemic. People of the DPRK have effectively consolidated under the wise guidance of the WPK as opposed to social unrest in the Western countries. Timely and effective response to the biological warfare-like condition accumulated public support for the Korean People’s Army, which has strengthened its combat capability as shown by the military drills in 2020.

In sum, the DPRK measures taken against the pandemic Covid-19 in 2020 have demonstratively proved to the world the truth of the Juche idea and the Songun idea, founded by President Kim Il Sung, propounded by General Secretary Kim Jong Il, and continuously held by wise guidance of Chairman Kim Jong Un.
