

An E-mail from Prof. Suresh P. Pathak,

who is director of the Board of Directors, Asian Regional Institute of the Juche Idea,
Professor rtd at Delhi University, India

Dear Dr. Ogami Ken-ichi,

It seems to me, though a little hyperbole, that ages back we communicated with one another. But there is a saying, whether right or wrong, I cannot vouch for it, that “No News are good News.” Trusting this adage I feel that everything is o.k. at your end and this is my conviction too.

I have been apprised with the great news that you held a brilliant seminar at Tokyo. No doubt this goes to your indefatigable and constant efforts laced with your farsightedness and wonderful organizational capability that you could garner the help and cooperation of the people who matter, to stage such a breathtaking event.

I am more than sure that under your superb guidance and exceptionally brilliant leadership Juche will slowly but surely reach billions of people across the globe and will become a very powerful source to strengthen the ideals of true socialism and act as a bulwark against the nefarious moves of the Capitalist world who outsmart one another to fleece the poor and make the rich richer at the cost of innocent and ignorant people of the world.

I wish you all successes in your noble efforts. In order to substantiate what I contend I am tempted to quote Chairman His Excellency Kin Jong Un quoted by you in your scholarly published in the “Study of the Juche Idea” No.91, p.84, I quote:

“Our party regards the people-first principle as its inherent nature and sacred political creed. So protecting and improving the health of the people is a most pressing honorable revolutionary undertaking, which it should shoulder and fulfil without fail, whatever the situation.”

Indeed to refer to such lofty and noble feats, pick them up and publish them through your laudable article, I speak in volumes about your sagacity which carries conviction to the reader.

Most effective and inspiring words are “People-first principle and improving the health of the people is most pressing honorable revolutionary undertaking.” This selection inter alia proves your deep understanding and insight into the immortal ideology. No doubt these are not your words but to give currency to such thoughts is your domain and amply proves without a shadow of doubt your full dedication to Juche or for that matter to Kimilsungism-Kimjongilism. In my humble opinion you deserve all praise because the dissemination of these ideas go a long but sure way to spread the message far and wide.

Of course watching you from such a long distance, my mind travels to Prof. Harish Gupta. To my mind he also does all that you are doing to spread the gospel in his own humble way. Your staging a Juche program at Tokyo, reminds me of what he has done for the ARIJI. On the Internet he could organize a seminar getting full support from the ARIJI directors. I strongly feel that taking his cue from you, he too can galvanize this Juche movement, of course you being the polestar.

I am thoroughly convinced that with your scholarship, deep understanding and thorough dedication to Juche Ideology you would continue to be a source of inspiration to One and all, Here in India we believe that under your superb guidance emanating confidence and self-assurance, the belief that “man is the master of his destiny” would gather more and more momentum. To my mind our Asian leader Harish Gupta has learnt many things from you without your being conscious of it because the Sun gives its Light to one and all but only the wise and the connoisseur make best use of it.

It seems to me that I have opened myself a little too much but I believe you would not take me amiss.

With regards to your better half and love and blessings to young son, and best of luck and health to you,

Sincerely,

Suresh P. Pathak
