

Speech at International Seminar on Juche Idea in Pyongyang

Kim Jong Un's Revolutionary Ideology Is Sole Guiding Ideology of WPK, Immortal Banner Leading Era of Independence

Kim Chang Gyong

Chief, Ideo-theoretical Section, Korean Association of Social Scientists

Offering my congratulations once again to you who participate in the international seminar of the Juche idea on “Immortal Banner for Building Just and Peaceful World”, I would like to say that the revolutionary ideology of the respected Comrade Kim Jong Un is the only guiding ideology of the Workers' Party of Korea and the immortal banner that leads the era of independence.

Today the Democratic People's Republic of Korea is hastening the comprehensive development of socialism in the banner of achieving prosperity by dint of self-reliance even under the worst situation where other countries would have been impossible to exist, to say nothing of their development.

The cause of the DPRK-style socialism is making dynamic advance despite the worst situation and the trend of anti-imperialism and independence is becoming stronger on the worldwide scale. Such realities demonstrate scientific accuracy, truthfulness and innovative strength of the revolutionary ideology of the respected Comrade Kim Jong Un.

The respected Comrade Kim Jong Un said:

“Our Party's revolutionary ideology is an ever-victorious banner leading the cause of Juche. It provides absolutely correct guidelines for ushering in a golden age of building up the Party and achieving national prosperity in the new era.”(“Officials Should Be Communist Revolutionaries for Whom the Party's Original Ideals and Spirit Are Their Mental Attributes,” October 10, 2024)

The prospects of revolution, the everlasting prosperity of a state and the happiness of generations to come are guaranteed by a scientific ideology. The most important mission of a political leader guiding the revolutionary struggle is to clearly light up the path of the revolution, the course ahead of the party and the state by advancing the scientific guiding

ideology.

The respected Comrade Kim Jong Un advanced original revolutionary lines and practical programmes for accelerating the comprehensive development of socialism and hastening the building of an ideal society of the people under the banner of Kimilsungism-Kimjongilism and thus performed everlasting ideological and theoretical exploits that guarantee the victorious advance of the revolutionary cause of Juche.

Kim Jong Un's revolutionary ideology is the one and only guiding ideology of the Workers' Party of Korea (WPK) and the revolution in the new era for accomplishing the revolutionary cause of Juche to the end, holding high the banner of modelling the whole society on Kimilsungism-Kimjongilism.

A new era of the Juche revolution is the era of great succession faithfully carrying forward the ideas and cause of President Kim Il Sung and Chairman Kim Jong Il under the wise leadership of the respected Comrade Kim Jong Un, the era of fresh advance and the new dynamism when the cause of achieving prosperity by dint of self-reliance is being accomplished and the era of self-dependence and prosperity when the DPRK's dignity and prestige are being demonstrated to the full.

Kim Jong Un's revolutionary ideology is the practical programme that gives comprehensive answers to all theoretical and practical problems arising in advancing the revolutionary cause of Juche with victory as required by Kimilsungism-Kimjongilism.

It is the one and only guiding ideology of the WPK and the revolution in the new era for accomplishing the revolutionary cause of Juche with success under the banner of Kimilsungism-Kimjongilism, and herein lies the historic position of Kim Jong Un's revolutionary ideology.

Socialism is an ideal of the masses of the people, and the WPK's aim of opening up a path of socialism and advancing socialism while resolutely braving all sorts of challenges of history is to provide them with a dignified and happy life.

Kim Jong Un's revolutionary ideology is run with a noble sense of responsibility and a mission to add more brilliance to the DPRK-style socialism centred on the masses of the people, and is oriented towards making selfless, devoted efforts for the good of the people.

All the ideas, lines and policies clarified by Kim Jong Un's revolutionary ideology, including the idea of the political ideal based on the people-first politics and the mode of

politics based on the people-first principle, the idea of the mode of existence and activities of the Party and the state, the new construction policy, the agricultural policy, the childcare policy and the idea of the officials' methods and style of work and their mental and moral traits, are the policies and guiding principles to regard the people as the sacred and provide them with the best life in the world.

The first decade of the great Kim Jong Un's Korea was the days when it demonstrated fully the truthfulness of the WPK's revolutionary ideas that it should be considered as the highest ideal to make the DPRK people the most dignified and the happiest ones in the world and everything they want should be translated into reality with sure.

Giving top and absolute priority to the people's interests has been adhered to as the consistent principle of the Party and the state in recent years. During the period, a golden age of construction for providing people with happy living was ushered in, thus building modern new streets and distinctive rural houses, and school uniforms and things are supplied regularly to the students and dairy products to the children throughout the country. The construction of modern public health facilities, leisure complexes and grain management facilities is being carried out simultaneously with the construction of modern regional-industry factories in line with the Regional Development 20×10 Policy and thus an era when the local areas change and prosper is being opened. These are the substantial successes and changes the DPRK people feel keenly every moment.

A harmonious whole, the single-hearted unity of the Party and the masses firmly united behind the leader is the national strength peculiar to the DPRK and an invincible strength guaranteeing the victory in advancing the cause of the DPRK-style socialism.

Kim Jong Un's revolutionary ideology also crystallizes policies and guiding principles for advancing victoriously the cause of the DPRK-style socialism by cementing the might of the single-hearted unity.

As they are led by Kim Jong Un's revolutionary ideology, the DPRK people did not become weak but got stronger, not divided but united more firmly even in the severe difficulties that constant threats of hostile forces and harsh natural disasters were accompanied by the worst public health crisis unprecedented since the founding of the country.

In the DPRK, ideological unity of the whole Party and society is being firmly ensured and communist virtues and beautiful traits of helping and leading one another forward are

solidified as a national custom. The might of a harmonious whole of the leader and people, the might of the great army-people unity and the might of beautiful virtues and feelings peculiar to the DPRK society were not only a source of miracles that gave birth to such new spirit of the times as the Paektusan hero youth spirit and created innovative achievements in the field of national defence, science and technology and myths of construction in the era of the WPK. It is but also an inexhaustible motive force that enabled the DPRK to win great victory in all fields of socialist construction.

The mission of the guiding ideology of the times is to raise key and core problems in blazing the trail for prosperity, development and the future of a country and clarify policies for solving them.

The most substantial and core problem in ensuring the future of a country and its people is to strengthen and develop a socialist ruling party into a promising one.

Kim Jong Un's revolutionary ideology clarified the five-point line of building the WPK in the new era. It is a far-sighted programme for building up the Party that enables us to firmly guarantee the eternal future of the Party and revolution by strengthening and developing it into a party that is politically matured, organizationally solid, ideologically pure, strict in discipline and sound in style of work.

An important lesson we learn from today's world is that nuclear forces can never be abandoned but should be further built up as long as imperialism and nuclear threats exist on the earth.

Kim Jong Un's revolutionary ideology clarified the new line of simultaneously conducting the economic construction and building up nuclear forces, the policy of the nation's nuclear forces and the line of building up nuclear forces. As a result, the DPRK has been provided with a practical guarantee capable of putting an end once and for all to the era in which big powers attempted to make bargains at their own will against the interests of our country and nation and the era in which the US imperialists threatened and blackmailed it with nukes and making its people and their posterity enjoy happiness and comfort generation after generation in the dignified strong country free from the holocaust of war for ever.

Kim Jong Un's revolutionary ideology is a future-oriented guiding ideology that illuminates the path for the eternal prosperity and everlasting happiness of all generations to come by remarkably building up the overall national strength, looking far into the

future of the revolution.

Huge and innovative realities are unfolded in succession as a display of the infinite mightiness of Juche Korea even in the worst adversity in which existence itself is a miracle. This proves the changes in the great Kim Jong Un's era brought about by the WPK's noble aspiration to build a country as the best in the world, an ideal powerful country of the people and hand it down to posterity.

Kim Jong Un's revolutionary ideology is also an immortal banner that guides the progressive people's struggle for independence and justice to victory.

Present times is a new high stage of the era of independence when the masses of people have emerged as masters of history and their own destiny and opened up their paths independently and creatively. It is the trend of the present times that the confrontation structure between the independent forces and the dominationist forces has become more obvious and, in this course, the strength of the countries aspiring towards independence and justice becomes strong, whereas imperialist and dominationist forces that pursue hegemony fall into decay and ruin.

As required by the present times, Kim Jong Un's revolutionary ideology dynamically encourages the progressive people's struggle to frustrate aggression and plunder, high-handedness and arbitrariness of imperialist reactionary forces, safeguard sovereignty, the right to existence and development of countries and nations and establish a just and equal international order.

Success or failure of the cause of global independence which accompanies a fierce confrontation with imperialist reactionary forces is decided by how socialist countries, non-aligned movements and other anti-imperialist, independent forces are prepared.

Kim Jong Un's revolutionary ideology clarified the idea of developing traditional friendly relations with the socialist countries, the idea that the socialist countries should give support and solidarity with one another, expand and develop cooperation and exchange between them to achieve their common goal and ideal, and the idea of keeping high vigilance against anti-socialist machinations by the imperialists.

Kim Jong Un's revolutionary ideology also gives comprehensive answers to the idea of adhering to the fundamental idea and character of the non-aligned movement as the anti-war, peace-loving force and strengthening unity and cooperation among the member states, the idea of realizing unity and cooperation of the parties, organizations and

progressive countries who champion independence under the banner of anti-imperialist independence and other principled issues to be adhered to in expanding and strengthening the anti-imperialist, independent forces.

In the present world where the logic of strength prevails, genuine peace, to say nothing of national dignity and rights, is inconceivable without military supremacy overwhelming the imperialist aggressive forces.

Kim Jong Un's revolutionary ideology clearly indicates the ways for building powerful national defence capabilities which are the cornerstone of the state existence and the reliable guarantee of dignity, security and peace of the country and people.

To prevail over the US high-handedness and arbitrariness in the international arena and break the old international order is a unanimous demand of the progressive people and an important task that must be carried out in raising global independence up to a high level. Kim Jong Un's revolutionary ideology comprehensively clarifies principles and ways to firmly adhere to an independent stand in the international arena and lead the progressive

people's struggle to establish a world order of justice.

Original ideas and policies, including the idea of realizing international justice and the policy on raising national prestige and defending national interests, are the guiding principles that enabled the DPRK to dramatically change the balance of power between the DPRK and the US and raise its prestige onto a new level.

Thanks to Kim Jong Un's revolutionary ideology, the WPK and the DPRK people will build an ideal society of mankind earlier than others and the trend of the times to frustrate aggression and plunder, high-handedness and arbitrariness of the imperialist reactionaries, defend the world peace and security and realize the international justice will grow stronger and stronger.

Eternal victory and glory are in store for the DPRK people and the world progressives who advance along the path indicated by Kim Jong Un's revolutionary ideology.
